	1	2	3	4	5	6	7	8	9	

Cut out one of these little rulers and wind it around your thumb as shown to find the proper pick size to order. These little paper rulers are in centimeters so you could use a measuring tape if you're worried your printer is not accurate enough when you print this page.

Check out these Archie bridges - they're designed especially for arch top banjos but you'll be amazed at the way they can super charge OB/BG250s, RK80s, B17s or similar banjos.

Visit our sister website <http://haruteq.com> for free banjo tabs.
